

## 2nd SEMESTER

### ORGAN-SPECIFIC AUTOIMMUNE DISEASES Pathogenesis-Diagnosis-Clinical Expression-Treatment

MARCH - MAY 2026

| DATE                   | TIME        | INSTRUCTOR                                                                                     | TOPIC                                                                                                                                                              |
|------------------------|-------------|------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| MONDAY<br>9/3/2026     | 17.00-18.30 | Pontikoglou Christos<br>Assoc. Professor of Hematology<br>Medical School - University of Crete | Immune-induced cytopenias                                                                                                                                          |
|                        | 18.30-20.00 | Solomou Elena<br>Assoc. Professor of Hematology<br>Medical School - University of Patras       | Immune-induced bone marrow failure                                                                                                                                 |
| WEDNESDAY<br>11/3/2026 | 17.00-18.30 | Nikitakis Nikos<br>Professor of Oral Medicine<br>School of Dentistry - NKUA                    | Manifestations of autoimmune diseases in the oral cavity                                                                                                           |
|                        | 18.30-20.00 | Piperi Lia<br>Assoc. Professor of Oral Medicine<br>School of Dentistry - NKUA                  | Manifestations of autoimmune diseases in the oral cavity                                                                                                           |
| MONDAY<br>16/3/2026    | 17.00-20.00 | Soura Efi<br>Asst. Professor, Medical School - NKUA                                            | Psoriasis - Pathophysiology, clinical expression and principles of therapy.<br>Bullous dermatoses - Pathophysiology, clinical expression and principles of therapy |
| WEDNESDAY<br>18/3/2026 | 17.00-18.30 | Nikolaou Vasiliki<br>Asst. Professor of Dermatology<br>Medical School - NKUA                   | Lymphoproliferative diseases of the skin                                                                                                                           |
|                        | 18.30-20.00 | Vaiopoulos Aristeidis<br>Attending Physician B' NHS<br>PhD, Medical School, NKUA               | Autoimmune skin diseases: Panniculitis, Cutaneous lupus, Morphea,                                                                                                  |
| MONDAY<br>23/3/2026    | 17.00-18.30 | Nikolaidou Ilektra<br>Professor of Dermatology<br>Medical School - NKUA                        | Autoimmune skin diseases: Vitiligo - Pathophysiology, clinical expression and principles of therapy.                                                               |

| DATE                   | TIME        | INSTRUCTOR                                                                                                                                                                     | TOPIC                                                                                                                                                                                              |
|------------------------|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                        | 18.30-20.00 | Chasapi Vasiliki<br>Director of State Dermatology Clinic<br>'SYGGROS' Hospital                                                                                                 | Alopecia: Pathophysiology, clinical expression and principles of therapy.                                                                                                                          |
| MONDAY<br>30/3/2026    | 17.00-18.30 | Tzouveleakis Argyris<br>Assoc. Professor of Pneumonology<br>Medical School - University of Patras                                                                              | Immunological lung diseases (Idiopathic pulmonary fibrosis): Pathophysiology, clinical expression and principles of therapy.                                                                       |
|                        | 18.30-20.00 | Karagiorgas Theofanis<br>Rheumatologist, MD, PhD<br>Scientific Associate, 4th Dept. of Internal Medicine,<br>'ATTIKO' Hospital                                                 | Interstitial lung diseases in the context of systemic autoimmune diseases:<br>Pathophysiology, clinical expression and principles of therapy.                                                      |
| WEDNESDAY<br>1/4/2026  | 17.00-18.30 | Bamyas Giorgos<br>Professor of Gastroenterology<br>Medical School - NKUA                                                                                                       | Immunological diseases of the gastrointestinal tract (Atrophic gastritis, Celiac disease, Idiopathic inflammatory bowel diseases): Pathophysiology, clinical expression and principles of therapy. |
|                        | 18.30-20.00 | Androutsakos Theodoros<br>Internist, MD, PhD<br>Scientific Associate of Pathophysiology                                                                                        | Autoimmune liver-biliary diseases (Autoimmune hepatitis, primary biliary cirrhosis, primary sclerosing cholangitis): Pathophysiology, clinical expression and principles of therapy.               |
| MONDAY<br>20/4/2026    | 17.00-18.30 | Bogdanos Dimitris<br>Professor of Internal Medicine & Autoimmune Diseases<br>Medical School - University of Thessaly                                                           | New data on autoimmune manifestations of the liver                                                                                                                                                 |
|                        | 18.30-20.00 | Paschou Lina<br>Asst. Professor of Endocrinology<br>Medical School - NKUA                                                                                                      | Autoimmune polyendocrine syndromes Type I diabetes, Addison's Disease:<br>Pathophysiology, clinical expression and principles of therapy.                                                          |
| WEDNESDAY<br>22/4/2026 | 17.00-18.30 | Mpotzios Giorgos<br>Endocrinologist - Director NHS - 'Laiko' Hospital                                                                                                          | Autoimmune diseases of endocrine glands (Autoimmune thyroid diseases):<br>Pathophysiology, clinical expression and principles of therapy.                                                          |
|                        | 18.30-20.00 | Fragkou Elena<br>Medical Officer A' Class Nephrology at Limassol<br>General Hospital, Researcher Associate BRFAA,<br>Honorary Lecturer at University of Nicosia Medical School | Immunological mechanisms of renal glomerular injury: Pathophysiology, clinical expression and principles of therapy.                                                                               |

| DATE                   | TIME        | INSTRUCTOR                                                                                                              | TOPIC                                                                                               |
|------------------------|-------------|-------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| MONDAY<br>27/4/2026    | 17.00-18.30 | Lionaki Sofia<br>Asst. Professor of Nephrology<br>Medical School - NKUA                                                 | Glomerulonephritis: Classification - pathophysiology, clinical expression and principles of therapy |
|                        | 18.30-20.00 | Gakiopoulou Charikleia<br>Professor of Pathology<br>Medical School - NKUA                                               | Glomerulonephritis: Main Pathoanatomical features                                                   |
| MONDAY<br>29/4/2026    | 17.00-18.30 | Maziotis Evangelos, Ph.D<br>Molecular Biologist - Geneticist, Postdoctoral<br>Researcher Medical School NKUA            | Autoimmune etiology of infertility: Diagnosis and management methods                                |
|                        | 18.30-20.00 | Simopoulou Mara<br>Professor of Physiology<br>Medical School - NKUA                                                     | The effect of autoantibodies on IVF outcome and embryo implantation                                 |
| MONDAY<br>4/5/2026     | 17.00-18.30 | Papadogonas Georgios, PhD<br>Molecular Immunologist, Postdoctoral Researcher<br>Medical School NKUA                     | Molecular basis of pregnancy immunology                                                             |
|                        | 18.30-20.00 | Kalampokas Theodoros<br>Asst. Professor of Gynecology<br>Medical School - NKUA                                          | Management protocols for patients with autoimmune diseases during pregnancy                         |
| WEDNESDAY<br>6/5/2026  | 17.00-20.00 | Stathopoulos Panagiotis<br>Asst. Professor of Neurology<br>Medical School - NKUA                                        | Basic Principles of Neuroimmunology                                                                 |
| MONDAY<br>11/5/2026    | 17.00-18.30 | Boufidou Foteini<br>Assoc. Professor of Microbiology<br>Medical School - NKUA                                           | Autoimmune neurological diseases: Diagnostic approach                                               |
|                        | 18.30-20.00 | Velonakis Georgios<br>Asst. Professor of Radiodiagnostics<br>2nd Department of Radiology - NKUA                         | Imaging of demyelinating lesions                                                                    |
| WEDNESDAY<br>13/5/2026 | 17.00-18.30 | Tzartos Ioannis<br>Neurologist<br>Scientific Associate, 2nd Dept of Neurology 'Attiko'<br>Hospital, Medical School NKUA | Myasthenia Gravis: Pathophysiology, clinical expression and principles of therapy                   |

| DATE                   | TIME        | INSTRUCTOR                                                                                                | TOPIC                                                                                                                          |
|------------------------|-------------|-----------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|
|                        | 18.30-20.00 | Evangelopoulou Maria-Eleftheria<br>Assoc. Professor of Neurology-Neurochemistry<br>Medical School - NKUA  | Multiple sclerosis and immune-induced demyelinating syndromes: Pathophysiology, clinical expression and principles of therapy. |
| MONDAY<br>18/5/2026    | 17.00-18.30 | Alexopoulos Charis<br>Asst. Professor of Biology - NKUA                                                   | Autoimmune peripheral neuropathies: Pathophysiology, clinical expression and principles of therapy                             |
|                        | 18.30-20.00 | Kapaki Elisavet<br>Professor of Neurology-Neurochemistry<br>Medical School - NKUA                         | Autoimmune Encephalopathies: Pathophysiology, clinical expression and principles of therapy.                                   |
| WEDNESDAY<br>20/5/2026 | 17.00-18.30 | Ladas Dimitris<br>Ophthalmologist, MD, PhD                                                                | Immunological eye diseases: Pathophysiology, clinical expression and principles of therapy                                     |
|                        | 18.30-20.00 | Delidis Alexandros<br>Assoc. Professor of ENT<br>Medical School - NKUA                                    | Immunological inner ear diseases: Pathophysiology, clinical expression and principles of therapy.                              |
| MONDAY<br>25/5/2026    | 17.00-18.30 | Mougiakos Thodoris<br>Director of Psychiatry Clinic<br>'414-SNEN' Hospital                                | Immunological disorders of psychiatric diseases: Pathophysiology, clinical expression and principles of therapy.               |
|                        | 18.30-20.00 | Golemati Christina<br>Psychologist-Psychotherapist, Ph.D<br>Lab of Pathophysiology, Medical School - NKUA | Mental Health and autoimmune diseases                                                                                          |
| MONDAY<br>26/5/2026    | 17.00-18.30 | Nezos Andrianos<br>Biologist, Ph.D                                                                        | Molecular biology techniques                                                                                                   |
|                        | 18.30-20.00 | Menelaos Manoloukos, MSc, PhD (candidate)<br>Molecular Biologist                                          | The Role of Biological Material Banks in Translational Research and Medicine                                                   |
